

Stellar Industries Propane Service Trucks

The Propane Gas Service Bodies are designed to haul a single 1000 –gallon or two 500 –gallon propane tanks, plus everything necessary to install and service the tanks. These service trucks are designed to safely carry small LP tanks with the use of E-track and fold down side rack (optional)

The Stellar TMAX Propane and LP Service Trucks are extremely versatile. They make transporting, loading and unloading gas cylinders a simple, single person operation without the need for a trailer or additional setting equipment. All cranes are operated with a fully radio remote control.
